

N O T I C E

CITY OF BURBANK 78TH STREET – NEWLAND AVENUE TO LONG AVENUE JUNE 10, 2020

Construction work on 78th Street is scheduled to start (weather permitting) the week of JUNE 22ND, 2020.

This project will include similar paving improvements as were completed on 77th Street last year including: the removal and the replacement of the existing curb and gutter, parkway driveway, alley, and sidewalk pavements (including public sidewalk at intersections), restoration of the disturbed parkways with topsoil and sod, hot-mix asphalt surface removal, hot-mix asphalt surface course paving, and the removal and replacement of unsuitable pavements.

Work will begin with the removal and replacement of the existing curb and gutter starting on the north side of 78th Street at Newland Avenue heading east to Long Avenue and then from Long Avenue back to Newland Avenue. **A second notice will be distributed, as the project progresses, to residents that have driveway access to 78th Street to notify them when they will be required to remove their vehicles from their garage or driveway.** Once the new curb and gutter and driveway pavements have been constructed and have sufficiently cured, vehicles can be returned to your garage or driveway. (Approximately one week after the driveway pavement is constructed).

The project will also include full removal of many intersections on 78th Street and will begin once the curb and gutter has been completed in these areas. This work will require traffic road closures until the street pavement is reconstructed in these areas. Traffic control signs will be posted accordingly.

Removal of the existing hot-mix asphalt surface course will follow the completion of the curb and gutter construction work. The hot-mix asphalt resurfacing, installation of pavement markings and the restoration of disturbed parkway areas with topsoil and sod will then be completed to finalize the improvement.

In general, during construction hours, on-street parking will be limited as per posted construction no-parking signs or municipal no-parking restrictions. Overnight on-street parking will be allowed unless parking is prohibited by the municipality, but vehicles will be required to be relocated before 7:00AM when construction resumes the following morning.

The Contractor will post Construction No-Parking signs along 78th Street as required in the working zone as work progresses. **Please adhere to these Construction No-Parking signs as posted.**

If you have a sprinkler system in the public parkway, please notify the Project Engineer as soon as possible so they can make any necessary adjustments to their plans.

Your cooperation during this project is greatly appreciated. If you have any questions regarding this project, please feel free to contact Mike Hansen, Project Manager, Novotny Engineering @ 630-863-9177.
